

As a taxpayer and resident of the State of Indiana we are quite satisfied with Indiana's no-call laws which prohibit the types of calls that the banking industry is asking to be allowed. We pay for our telephone service and feel that we should be able to control the advertising and selling types of calls which come into our home.

Allowing the federal law to preempt our state law will greatly reduce the effectiveness of Indiana's law which is helping to protect our lives from intrusion by these undesired telephone calls.

We are very strongly against 02-278. Robert & Melinda Bradbury Jr.
